

School Improvement Plan Summary

Truro Primary School

Goals	Targets	Challenge of Practice	Success Criteria
To improve student achievement in Reading	2022: For 75% of students in R-3 to achieve SEA or above in reading.	If we prioritise a consistent daily timetabled reading program, with a focus on embedding systematic synthetic phonics and vocabulary development, then we will increase student achievement in reading.	<ul style="list-style-type: none"> We will see each student in R-3 recognise and name all upper- and lower-case letters (graphemes) and know the most common sound that each letter represents. We will see each student in R-3 use short vowels, common long vowels, and consonant blends when decoding words to read. We will see each student in R-3 show their understanding that a sound can be represented by various letter combinations. We will see each student in R-3 improve their visual memory to read and write high-frequency words. We will see each student in R-3 apply reading strategies such as predicting, monitoring, cross-checking, self-correcting, skimming, and scanning, more consistently when reading.
	2023: For 80% of students in R-3 to achieve SEA or above in reading.		
	2024: For 80% of students in years 3-5 to achieve SEA or above in reading.		
To improve student achievement in Numeracy.	2022: For 65% of students in years 3 & 5 to achieve SEA or above in NAPLAN, 2022.	If we explicitly teach mental computation strategies and provide problem solving opportunities at least twice a week in maths lessons, with a particular focus on vocabulary, we will improve student achievement in numeracy.	<ul style="list-style-type: none"> We will see each student solve simple addition and subtraction problems using a range of efficient mental and written strategies. We will see each student in R-2 subitise to 5 and apply simple mental strategies demonstrating their ability to trust the count. We will see each student in years 3-5 use explicitly taught vocabulary in Maths to solve problems. We will see most students in years 3-5 to use reasoning skills, solving problems at or above their expected achievement standard. (use scope & sequence document)
	2023: For 75% of students in years 3 & 5 to achieve SEA or above in NAPLAN, 2023.		
	2024: For 80% of students in years 3 & 5 to achieve SEA or above in NAPLAN, 2024
